ABSTRACT

A study was conducted of the persistence rates of new full-time students at San Jose Community College (SJCC) and Evergreen Valley College (EVC), California, for fall 1988 through spring 1990. Persistence was examined by ethnicity, gender, and age. Study findings included the following: (1) less than 7% of the colleges' students were new full-time students; (2) over an estimated 90% of the students on financial aid began SJCC/EVC below the college level; (3) Whites comprise 48% of the community population, but only 6% of new full-time students at SJCC and 4% at EVC; (4) Hispanics comprise 27% of the community population, and 22% of the new full-time students at SJCC, and 18% at EVC; (5) over the past 10 years, the proportion of Whites attending SJCC/EVC dropped dramatically, while the proportion of Asians and Hispanics climbed steadily; (6) at both colleges, most new full-time students (66%) were 20-24 years of age, while 21% at SJCC and 22% at EVC were 25-34 years of age; (7) EVC Pacific Islanders had the lowest first-semester completion rate (38%), followed by other EVC other nonwhites (51%), EVC Hispanics (58%), and SJCC Hispanics (59%); (8) the highest first semester completion rates were demonstrated by Asians and Whites (77% each) at SJCC, along with EVC American Indians (78%), Filipinos (78%), unknowns (76%), and Asians (76%); (9) Black males at SJCC (56%) and Asian females at EVC (76%) had the highest fourth semester persistence rates at their respective colleges; (10) compared to the community (27%), Hispanics were the least represented among graduates (16% at EVC and 17% at SJCC); (11) Whites represented a majority of graduates (55% at both SJCC and EVC), although they comprised less than 10% of new full-time students; and (12) in fall 1990, only 34% of new students had transfer as a goal, and 43% said they wanted an Associate of Arts or Bachelor of Arts degree. The report consists almost entirely of data tables, graphs, and charts, showing data by college and year. (JMC)

DATA HIGHLIGHTS

New Full-Time Students

- Less than 7% of our students are new full-time
- Financial assistance is a key to attending full-time
- It is estimated that over 90% of students on financial aid begin below the college level; they take more than two years to graduate
- Compared to Whites in our community (48%), new full-time Whites are greatly underrepresented at 6% at SJCC and at 4% at EVC; Hispanics are somewhat underrepresented with 27% in the community and 22% at SJCC and 18% at EVC

10-Year Trend

- Over the past 10 years, the proportion of Whites has dropped dramatically (from 86% to 33% at SJCC and from 65% to 19% at EVC); the proportion of Asians and Hispanics has climbed steadily (from below 10% at both colleges to 22% each at SJCC and 37% Asians and 22% Hispanics at EVC)

Age

- At both colleges, most new full-time students (66%) are 20-24 years of age, 21% (SJCC) and 22% (EVC) are 25-34

Completion Rates

- Among the lowest 1st semester completion rates are EVC Pacific Islanders (38%), Other Nonwhites (51%), and Hispanics (58%), along with SJCC Hispanics (59%); Asians (77%) and Whites (77%) at SJCC, along with EVC American Indians (78%), Filipinos (78%), Unknowns (76%), and Asians (76%) have among the highest

Persistence Rates

- Black Males at SJCC (56%) and Asian Females at EVC (76%) have the highest 4th semester persistence rates at their respective colleges

Graduates and Transfers

- The percentage of EVC Asian transfers (45%) greatly exceeds the percentage of EVC Asian graduates (23%)
- Compared to our community (27%), Hispanics are the least represented among our graduates (16% at EVC; 17% at SJCC)
- Whites represent a majority of graduates (55% at both SJCC and EVC) although they comprise less than 10% of our new full-time students
- In Fall 1990, only 34% of new students had transfer as a goal; only 43% said they wanted an AA or BA degree (Research Report #99)
